

Children's Place Montessori is open for a shortened summer session from Aug 3 -28. Our school year will start on Aug. 31. We have reconfigured our classrooms to respond to the need for social distancing and created "pods" for each child in one of our classrooms. The pods are populated with materials that each child will enjoy and respond to their individual academic interests. The materials are adjusted regularly to meet the child's changing ability levels. The other classroom is structured as a traditional Montessori classroom, but plexiglass shields have been installed to assure that the children are safe. This room will have a "sanitation station" and the materials will be disinfected after every use.

We are limiting our enrollment this year to assure that each child has plenty of indoor space. For outdoors, we have purchased sunhats with face shields for each child. We are doing our best to make sure our indoor and outdoor environments are safe places for your child to work and play.
